Dear Elise Hurd:

Your request to conduct a research project in the Jordan School District concerning "Examining Grade 6 Teachers' Mathematical Curricular Reasoning" has been given district-level approval by the District Research Review Committee according to the parameters of the study listed in your application.

Although you have received Research Review Committee approval, this decision does not obligate a district department or school to participate if circumstances or events are such that the research would create problems or would be overly burdensome. You will now need to contact Any Jordan School District Elementary Principals whose schools will be part of your research to obtain their approval to conduct your study.

- In your methodology you stated that two teachers would be chosen through email communication with a district mathematics specialist. When you are ready, please reach out to our office. We can provide a list of 6th grade teachers that meet that criterion.

Please send a copy of your final findings, conclusions, and recommendations from the study to the Assessment, Research & Accountability Department. Thank you for your interest in conducting research in Jordan School District.

Sincerely,

Ben Jameson

Ben Jameson, Member
Research Review Committee
